

BlackBerry Internet Service Ver2.0 (additional notes)

1. What is the mailbox size with the BlackBerry Internet Service Email ver2.0?

With the new 30 days auto-aging feature, the system automatically ensures there's sufficient space for incoming emails by deleting emails from the device which are more than 30 days old, so the BlackBerry mailbox never gets full.

2. With the 30 days auto-aging feature, do I still need the extra storage (50MB/100MB) that I have subscribed?

You no longer need the extra storage since the BlackBerry mailbox never gets full. Please contact 1626 to remove the extra storage subscription and subscription charges.
